

PRESS RELEASE

ANNOUNCING PRE-ORDERS FOR HEASY: THE WORLD'S FIRST INTERACTIVE ROBOT KIOSK

LYON, France (Jan. 9, 2018) – Just one year after the launch of Heasy at the 2017 CES, Heasy the interactive Robot Kiosk is coming to market within the next months.

Since 2016, Heasy has been working in full autonomous mode for more than 100 days in various locations such as mall centers, gas and train stations, in facility management and store environment to welcome and entertain customers. Heasy, the first interactive robot kiosk, offers a new generation of services for retail, reception and tourism industries. The robot kiosk is 30 times more efficient than a classic kiosk to grab attention and allows its users to find a specific information in less than 2 minutes.

After the huge success and overwhelming support from our first customers, we are pleased to announce the opportunity to pre-order Heasy at a starting price of €1000 / month.

“Today’s announcement marks a major milestone for our company.”, says Max Vallet, CEO of Hease Robotics. “We are incredibly excited for our customers to welcome this smart and useful robot into their premises”.

Pre-orders placed through our Pre-Order page (www.heaserobotics.com/pre-order) will start shipping in June 2018 timeframe. Orders will be fulfilled on a first-ordered, first-received basis.

Hease Robotics CTO Jade Le Maitre and other members of the team will be on hand at the CES 2018 at booth #51059 (Eureka Park) to show off Heasy to press, partners and customer enthusiasts. Hease Robotics CEO Max Vallet will be on hand at the NRF 2018 (New York Jan 14-16, 2018) on the Worldline booth to illustrate a strategic partnership.

Reporters interested in speaking with our team and seeing Heasy in action should reach out to press@heaserobotics.com to schedule a meeting with us at CES and / or NRF.

ABOUT HEASE ROBOTICS

Hease Robotics is a french professional services robot manufacturer dedicated to the retail industry and customer services.

As our interactive robot kiosk Heasy can be used in various public places, it can be tailored to various industries: retail, transports, leisure and facility management.
